## Help with Reading, Writing and Spelling

Systematic, sequential, explicit, multisensory teaching leads to success for students who struggle in traditional academic situations. The proven Orton-Gillingham (O-G) approach develops the skills required for reading, writing and spelling

## Help with Handwriting & Keyboarding

Children not only learn to read more quickly when they also learn to write by hand, but they are better able to generate ideas and retain information. Our practice offers print remediation (2nd grade and up), cursive script, and handwriting fluency programs. We also teach keyboarding to prepare children and teens for our fast changing world.

## Help with Executive Function Skills

Some children, and adults, are hampered in their learning, and their personal lives, by poor executive function skills. These affect time-management, organization, and motivation, and can lead to failure in otherwise capable students. We offer the Sklar *Seeing My Time* class, which teaches self awareness, advocacy and strategies to make effective use of time.

## Schoolhouse Games

Schoolhouse Games were created to improve working memory skills.
